

# Automated Redaction

Flexibility, Reliability and Enhanced Speed for your Redaction Processing of Sensitive Information from Recorded and Publicly Facing Documents

**Identity Theft** is an alarming trend and personal data in online public records puts your citizens at risk. ID Shield Office is a powerful and cost effective redaction tool that can help you streamline the process of securing the sensitive data in your electronic documents.

## ID Shield Office: Redaction on Demand

ID Shield Office streamlines the process for removing sensitive information from electronic documents. It helps businesses and government offices comply with State and Federal identity theft, privacy and information security legislation such as the FOIA, HIPPA, Privacy and Sarbanes Oxley Acts.

Simply load ID Shield Office software and you're ready to go. This easy to use tool allows you to redact any type of electronic document that you may then print, email or file.

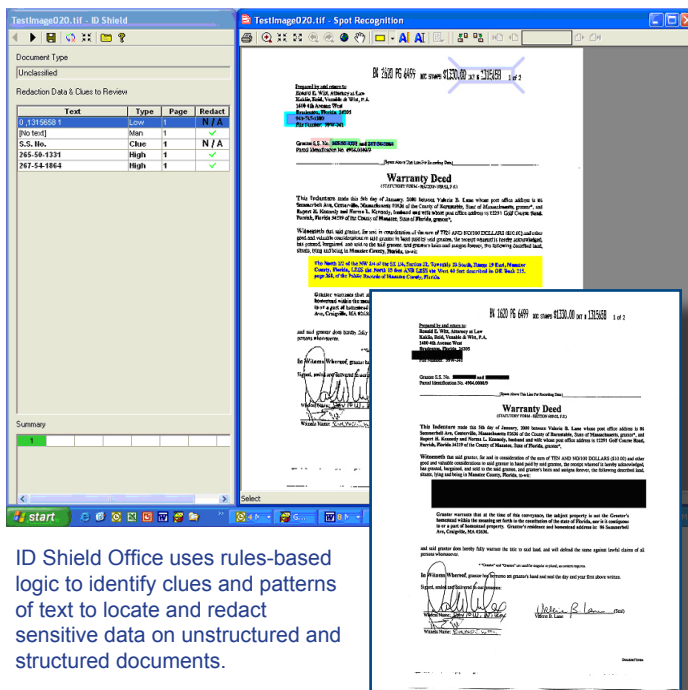

### With ID Shield Office, You Can:

- Automatically find and redact pre-defined data types: Social Security numbers, credit card numbers, Federal Employer ID numbers, bank account numbers, email addresses and drivers' license numbers
- Define and store your own set of words and terms to find and redact automatically
- Redact the following types of documents: Microsoft Word, Excel, PowerPoint and email
- Draw a custom redaction zone anywhere on your document

Approximately 10 million people will be victims of identity fraud this year. The average cost of an identity theft case is \$691 per incident. Total estimated losses in the United States exceed \$50 billion a year.

Consumer Fraud and Identity Theft Complaint Data (FTC - February 2008)

2008 Identity Fraud Survey Report Javelin Strategy and Research

ID Shield Office uses rules-based logic to identify clues and patterns of text to locate and redact sensitive data on unstructured and structured documents.

- **Document Types:** Single and Multi-page TIFFs, PDFs, all Microsoft documents, and email
- **Interface:** Keyboard-driven Option Provides Maximum Efficiency
- **Rule Set:** Comprehensive and Rigorously Tested
- **Learning Curve:** ID Shield Office Integrates into your Existing Workflow
